

This SUMMER I can practice my math facts in many different ways!

Kindergarten – Addition and Subtraction to 10 1st Grade - Addition and Subtraction to 10 2nd Grade - Addition and Subtraction to 20

I learn my math facts by using strategies and practice until I know them so well that the answers pop in my head!

<p>NO TOOLS NEEDED!</p> 	<p>GAMES!! (Cards or dice)</p> 	<p>DIGITAL!! (apps or websites)</p> 
<ul style="list-style-type: none"> • License plate math (add the digits up/find the greatest total) • Pick a Number Half/Double (ex. #8 double = 16, half = 4) • Count all the ____ you see (How many red cars do you see? How many signs do you see?) • Other – what ideas do you have? 	<ul style="list-style-type: none"> • War • Make tens (played like Go Fish, but goal is to make 10. If you have a 4, you would ask for a 6) • How many 'til 10? (flip over a card and see how many more or less to get to 10) • Roll 2 Dice (add/subtract) • Farkle • Yahtzee • Other – what games do you like? 	<p>If you visit the link below, you will find lists of links for students as well as lists of iPad apps. Keep track of your favorite sites and apps on the back of this sheet. You can also add others that you like!</p> <p>http://fpselementarymath.wikispaces.com</p>

Tally every time you practice for at least 5 minutes! *(Return this sheet to your teacher in September!)*
